Fourier-Mukai transform - Wikipedia In algebraic geometry, a Fourier-Mukai transform \hat{K} is a functor between derived categories of coherent sheaves $D(X) \rightarrow D(Y)$ for schemes X and Y , which is, in a sense, an integral transform along a kernel object $K \in D(X \times Y)$. **FOURIER-MUKAI PARTNERS OF SURFACES IN POSITIVE CHARACTERISTIC** **FOURIER-MUKAI PARTNERS OF K3 SURFACES IN POSITIVE CHARACTERISTIC** 5 Following standard conventions, let $K(1)$ denote the F-isocrystal whose underlying vector space is K , and whose Frobenius action is given by multiplication. **big picture - Heuristic behind the Fourier-Mukai transform ...** The Fourier-Mukai transform in algebraic geometry gets its name because it at least superficially resembles the classical Fourier transform. (And of course because it was studied by Mukai.) Let me give a rough picture of the Fourier-Mukai transform and how it resembles the classical situation.

Fourier-Mukai transforms for quotient varieties ... A Fourier-Mukai (FM) transform is an exact equivalence $\hat{K}: D(Y) \rightarrow D(X)$ between the bounded derived categories of coherent sheaves on two smooth projective varieties X and Y . Fourier Mukai transforms and applications to string theory Fourier-Mukai and string theory explicit description of stable holomorphic vector bundles was required and inspired the seminal work of Friedman, Morgan and Witten [58, 59, 61]. **Fourier-Mukai transforms - University of Bonn Basics** Fourier-Mukai transform Compositions Fully faithful Equivalences Spherical twists $X, X_0 =$ smooth projective varieties $/C$ and $E \in \text{Db}(X \times X_0)$. The Fourier-Mukai transform $\hat{K}: E$ with Fourier-Mukai kernel E is the composition p .

Fourier-Mukai transforms and Bridgeland stability ... (FMTs and stability conditions on abelian threefolds in the literature) of the heart of the stability condition. In this paper we use Fourier-Mukai. **Fourier-Mukai duality for K3 surfaces via Bridgeland ...** Fourier-Mukai duality is a duality between a variety X and a moduli space of stable sheaves on X , which is a generalization of the duality between an abelian variety X and its dual abelian variety $\text{Pic}^0(X)$. In this article, we shall explain Fourier-Mukai duality for a K3 surface by using Bridgeland stability condition.
